1 Sketch in Wood

2 Persona Confetti

3 Sketch in Metal

Sketch in Wood

for Percussion Quartet

Percussion 1: high and middle pitched woodblocks,
[stage right] middle and low pitched skulls.

Sampled: clave, middle pitched woodblock,
high and middle pitched skulls.

Percussion 2: middle and low pitched woodblocks,
[stage left] middle (to low) and low pitched skulls,
log drum.

Sampled: middle pitched woodblock (somewhat
different to that of Perc.1), log drum, middle and low
pitched skulls.

N B ***Sampled*** sounds are triggered from Octopads or similar MIDI device and sent from the sampler to an amplifier and speakers. Each octapad will have a discreet MIDI channel to a particular sound. The glissandi effects required by the score are achieved by means of a (MIDI) pedal assigned to the portamento control and operated like a timpani pedal. The sounds in the sampler should be allocated in a stereo image: Percussion1 in degrees of the left image; Percussion2 in degrees of the right image.

Percussion 3: Xylophone
[centre stage left]

Percussion 4: Marimba
[centre stage right]

N B Rhythmic groupings (of the indeterminate pitch instruments) should be dynamically even, however, the first note of any group may receive some accent.
