

FARM PLANNING: A BUSINESS MANAGEMENT PERSPECTIVE

VICTOR EDWARD WRIGHT

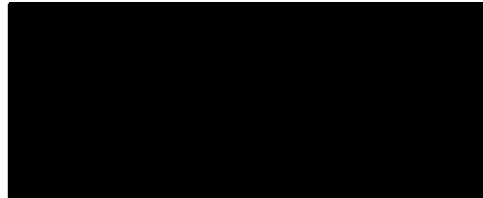

B.Com. (UNSW), M.Com. (UNSW)

A thesis submitted for the degree of
Doctor of Philosophy
of the University of New England

July, 1985

I certify that the substance of this thesis has not already been submitted for any degree and is not being currently submitted for any other degree.

I certify that any help received in preparing this thesis, and all sources used, have been acknowledged in this thesis.

ACKNOWLEDGEMENTS

I extend my deepest gratitude to the members of the Department of Agricultural Economics and Business Management who have assisted me, in a variety of ways, in the preparation of this thesis. Specific and prominent assistance was afforded by: John Dillon, who provided timely support and counsel; John Wicks, who helped me comprehend some of the deeper mysteries of APMAA; and Kevin Parton, who engaged freely in frequent and fruitful discussion. For his insistence on intellectual rigour and clarity of expression, his support, and his acceptance of the extraordinary demands I have made of him, my sincere thanks are due to my supervisor, Warren Musgrave.

I must thank my typist, Sue Lucas, whose technical skills are matched only by her forbearance.

Responsibility for any errors or omissions is mine.
