

**MOLASSES-UREA BLOCK
SUPPLEMENTATION OF BEEF CATTLE
ON THE BARKLY TABLELAND OF
NORTHERN TERRITORY DURING THE
DRY SEASON**

**JOHN WAYNE BACKHOUSE B.V.Sc
(Sydney University) M.A.C.V.Sc**

***OLSSON INDUSTRIES*
19-25 NELSON ROAD
YENNORA NSW 2161**

**A thesis submitted for the degree of
MASTER OF RURAL SCIENCE
Of the University of New England
March 2000**

I certify that the substance of this thesis has not already been submitted for any degree and is not currently being submitted for any other degree or qualification

I certify that any help received in preparing this thesis and all sources used, have been acknowledged in this thesis.

...

Acknowledgments

- 1.To my sons Nathan and Benjamin who encouraged me to complete this work
- 2.To Professor Daria Love, a classmate and associate who has encouraged me throughout my professional career and whose integrity never fails.
- 3.To my supervisors, Emeritus Professor Leng, an inspiration, and Associate Professor J.V.Nolan without whose help the thesis would not have been finished.
- 4.Mr. Charles Olsson, without his moral and financial support the project would have been impossible.
- 5.Heytsbury Pastoral Company, particularly Mr. Ian Rush, the manager of Anthony Lagoon, for friendship, assistance and enthusiasm.

And lastly I echo the sentiments of Czerkawski, 1986, in
An Introduction To Rumen Studies:

"To all those who did not try to discourage me"

TABLE OF CONTENTS

1	<i>Abstract</i>	8
2	<i>INTRODUCTION</i>	13
3	<i>STATEMENT OF THE PROBLEM</i>	13
3.1	Specific aims	14
3.2	Site description	15
3.3	Pasture availability	19
3.3.1	Pasture composition	20
4	<i>REVIEW OF PHYSIOLOGY, ANATOMY AND FUNCTION OF THE RUMINANT DIGESTIVE TRACT</i>	24
4.1	The animal	24
4.2	The stomach	24
4.3	Rumen contents	26
4.4	Ruminal movements	27
4.5	Absorption from the rumen	28
5	<i>MICRO-ORGANISMS</i>	29
5.1	Overview	29
5.2	Bacteria	30
5.3	Methanogens	32
5.4	Protozoa	35
5.5	Anaerobic fungi	37
5.6	Carbohydrate fermentation	39
5.7	Volatile fatty acid production	40
5.8	Fermentation pattern	41
5.9	Propionate	43
5.10	Acetate	43

5.11	Butyrate	43
5.12	METABOLISM OF SHORT CHAIN FATTY ACIDS	43
5.12.1	Propionate.....	43
5.12.2	Acetate and butyrate	44
5.13	STOICHIOMETRY OF FERMENTATION	46
6	<i>PROTEIN – NITROGEN METABOLISM</i>	49
6.1	Overview	49
6.2	Non-protein nitrogen	50
6.3	Synthesis of microbial protein	50
6.4	The effect of diet.....	51
6.5	Nitrogen transactions in the rumen.....	52
6.6	Soluble protein and undegraded (bypass or escape) protein	53
6.7	Summary of protein and the ruminant	55
7	<i>MINERALS</i>	56
7.1	Phosphorus	57
7.2	Delayed growth and puberty referable to phosphorus and protein deficiency	59
7.3	Effect of year-round reproduction	60
7.4	Effect of the age of the cows on reproductive rates.....	60
7.5	Protein type and phosphorus supplementation	64
7.6	Cobalt	65
7.7	Copper.....	67
7.8	Selenium.....	68
7.9	Vitamin E and selenium	68
7.10	Vitamin A.....	69
8	<i>LIPID METABOLISM</i>	69
9	<i>THE REPRODUCTIVE PROCESS</i>	69
9.1	The bovine oestrus cycle	70

9.2	The requirements for reproduction.....	72
9.3	Amino acids as substrates for atp generation.....	73
9.4	The effect of diet on glucose production	74
10	<i>BODY CONDITION, REPRODUCTION and DIET INTERACTION.....</i>	75
10.1	Fat deposition	76
10.2	Fat depletion	76
10.3	Glucose and amino acid effects	77
10.4	Level of nutrition.....	77
10.5	Ovarian function post-partum	78
11	<i>REVIEW OF SUPPLEMENTATION IN NORTHERN AUSTRALIA.....</i>	79
11.1	Mortality of females	80
11.2	Nutrition and fertility interactions	81
11.3	Other supplements	85
11.4	Supplement strategies	85
11.5	Control of Supplement intake.....	85
11.5.1	Palatability.....	86
11.5.2	Urea nitrogen and phosphorus requirements	86
11.5.3	Distribution of supplements to the herd.....	87
11.6	Dry lick supplementation	87
11.7	Supplementation in the form of blocks	88
12	<i>GENERAL MATERIALS AND METHODS – INTRODUCTION</i>	89
12.1	Supplement manufacture and application.....	91
12.2	Experimental site and animals.....	92
12.3	Bleeding technique	95
13	<i>ANALYTICAL METHODS</i>	95
13.1	Serum lithium – analysis by atomic absorption spectrophotometry	95
13.2	Calculation of amount of block eaten.....	96

13.3	Serum urea nitrogen analysis.....	96
13.4	PROGESTERONE ASSAY METHOD	97
13.4.1	Reagents	97
13.4.2	Progesterone Standards (Sigma).....	97
13.4.3	Progesterone Antiserum.	97
13.4.4	I-125 Tracer (Amersham IM 140).....	98
13.4.5	Dextran coated charcoal	98
13.4.6	Assay Setup Procedure	98
13.4.7	Extraction Procedure	99
13.4.8	RIA Procedure	99
13.5	OESTRADIOL ASSAY METHOD.....	100
14	EXPERIMENTAL METHODS.....	101
14.1	Experiment 1 (part 1)	101
14.2	Experiment 1 (part 2)	101
14.3	Experiment 2 (part 1)	101
14.4	Experiment 2 (part 2)	101
14.5	Experiment 2 (part 3)	102
14.5.1	STATISTICAL PROCEEDURES	102
14.5.2	Intake and physiological status.....	102
14.5.3	Intake compared at three stages of pregnancy	102
14.5.4	Serum urea nitrogen	102
15	RESULTS	103
15.1	Experiment 1 (parts 1 & 2) – estimation of block intake.....	103
15.2	Experiment 2: distribution of cattle eating block.....	104
16	INTAKE ACCORDING TO PHYSIOLOGICAL STATE	105
16.1	Experiment 2 Intake (g) according to stage of pregnancy.....	106
16.2	Serum urea nitrogen	106
16.4	Progesterone level: pregnancy and oestrus.....	107
16.5	17 β -OESTRADIOL ASSAY EXPERIMENT 2	108
16.6	COW WEIGHTS	Error! Bookmark not defined.

16.7	CALF WEIGHTS	Error! Bookmark not defined.
17	GENERAL DISCUSSION	109
17.1	Intake estimations	110
17.2	Serum urea nitrogen	113
17.3	Supplement intake in pregnant compared with non pregnant intake.....	113
17.4	Pregnancy and progesterone.....	116
17.5	Pregnancy and oestradiol	118
17.6	Calf live weights	118
18	CONCLUSIONS.....	119
19	REFERENCES.....	123
20	APPENDICES.....	138
20.1	APPENDIX 1 Block intake and individual variation (Expt. 1, part1)	138
20.1.1	APPENDIX 2 Results cattle 2 nd sample 1995	147
20.1.2	APPENDIX 3 Supplement intake (Expt 2)	152
20.1.3	APPENDIX 4 Pregnancy testing (Expt 2).....	155
20.1.4	APPENDIX 5 Intake with reference to gestation length	159
20.1.5	APPENDIX 6 Progesterone assay	159
20.1.6	APPENDIX 7 17 β -oestradiol assay results	162

TABLE OF TABLES

Table 1.	Effect of supplement value on branding and weaning weights	15
Table 2	'Anthony Lagoon' physical characteristics	16
Table 3	Mitchell Grass nutritional quality	18
Table 4	Total standing dry matter (kg /ha)	23
Table 5:	The effect of diet and microbial cell : VFA production on methane productio	33
Table 6	Dietary effects on VFA proportions.....	42
Table 7	Efficiency of microbial multiplication and heat production	48
Table 8	Effect of supplementation with high-phosphorus blocks* on cycling frequency in heifers and on fertility of cows	58
Table 9.	The effect of phosphorus supplementation* on growth rate and fertility of cattle	59
Table 10	Branding percentages at 'Dagworth' station (1990-94)	84
Table 11	Published formulation of dry season blocks	93
Table 12	Experiment 2. Mean block intake of cattle according to physiological breeding status	106
Table 13	Mean block intake of cows in November, 1996 classified as being in 'early- pregnancy', 'mid-pregnancy' or 'late-pregnancy'	106
Table 14	Experiment 1: Distribution of pregnancy and lactation with reference to progesterone levels above and below 31.8 nmol/l	107
Table 15	Oestradiol estimations were only carried out on samples with progesterone...	108
Table 16	Live weights of 25 randomly sampled calves in November 1996	108
Table 17	Expt. 1 Block intake and serum urea N.....	138
Table 18	Expt. 1 (part 2).....	147
Table 19	Supplement intake (Expt 2).....	152
Table 20*	Pregnancy status 2 = pregnant 1 = nonpregnant.....	155
