

**Substrate Language Influence in Kriol:
The Application of Transfer Constraints to Language
Contact in Northern Australia**

Jennifer M. Munro
BA(Hons) UNE, GRAD CERT TESOL UNE.

A thesis submitted for the degree of
Doctor of Philosophy of the University of New England.

July 2004

I certify that the substance of this thesis has not already been submitted for any degree and is not currently being submitted for any other degree or qualification.

I certify that any help received in preparing this thesis, and all knowledge in this thesis

4.

Abstract

Kriol, an English lexified creole language of northern Australia, is the primary language of the Roper River region in the Northern Territory. This thesis examines Roper Kriol for evidence of influence from the Indigenous substrate languages of that region. A method used only twice before in the field of pidgin and creole studies, the Transfer Constraints approach, is used to do this. In this way this thesis also aims to further test this theoretical construct.

Chapter 2 provides the sociohistorical background to the emergence of Kriol in the Roper River region, which includes: demographic figures; description of contact in the pastoral industry; and a summary of language contact. This information leads to an identification of the timeframes for when the processes of transfer and levelling may have occurred.

In each chapter to follow, the Roper River substrate languages are compared to find shared core features. Predictions are made based on the reinforcement principle of frequency as to the features that could be expected to have been retained during levelling of the stabilising pidgin and ultimately would be found in Kriol. A description of any corresponding Kriol feature follows. The availability constraints of perceptual salience and congruence are then examined in relation to English, in order to determine whether transfer to the preceding pidgin was constrained or not. The discussion also takes into consideration pidgins in the environment that preceded the creole, alongside other linguistic processes. Chapter 3 starts by examining the morphology of the verb complex and similarly chapter 4 examines the morphology of the nominal complex. Chapter 5 examines semantic category transfer in relation to the pronominal, TMA and case marking systems. Finally, chapter 6 provides an analysis of the nature of nominal modification for evidence of transfer of demonstrative, adjective, possession marking and number marking strategies.

Acknowledgments

I would like to acknowledge the very great teachers whom I was privileged to live and work with in the Northern Territory and their vibrant culture that is very much alive. I am particularly beholden to my *baba-mop*: Dinah Garadji, Cleo Wilfred, Hazel Farrell, Betty Roberts, Eva Rogers (*bobala, imin basawei-na*), Gertie Huddleston and Angelina George. All the *baba gija* also have large families, all of whom contributed to my *blekbala* education in many ways. *Main dubala baba, ol-Cleo en ol-Hazel, wal det dubala-na bin rili lenimbat mi eberrijing bla wi mop*. I received a large part of my cultural education at Minyerri especially from, August Sandy, Stephen Roberts, Barney Illaga, Tibby Illaga, Dorothy Watson, Sammy Limmen and Hodgson Wilfred (*dis dubala bin basawei du, bobala*). *Ai garra thengk yumop. Yumop bin lenimbat mi eberrijing wulujim ai gin sabi blekbala wei en wanim Guyal rait-thru*.

Thanks so very much to my supervisors. Jeff Siegel, your unending patience is amazing and I know I wouldn't have finished this without your enthusiasm, critical assessment and support along the way. Mind you I wouldn't have started it if you and Diana hadn't inspired me in the first place during undergrad! Brett Baker, you pulled my analysis of the Roper languages into line, and organised my use of digital technology in the final field trip, as well as spending too much time on reading drafts. Thanks also to all at LCL and research services at UNE in Armidale.

Diwurruwurru-jaru Aboriginal Corporation (DAC) provides much assistance to linguists in the field and really opened the door for me to enter Kriol country; thanks especially to Robin Hodgson and various committees. Denise Angelo, you gave so generously in the NT and your encouragement of late is so appreciated; to those days in the sun eh?! Jan Jardine, I learnt so much from your quiet perseverance, we missed you when you left Kriol country and Siobhan Casson, its great you're back! Thanks to Rosie O'Donnell for all those long raves; Joyce Hudson for feedback on the conference paper and encouragement; and Margaret Sharpe for sharing info over the years. Staff at the Northern Land Council (NLC), Wendy Asche, Ben Scambary and Jeff Stead, thanks for your professionalism; the collaboration with you renewed my faith in the field. And here's to Frank Zandvoort – and to a life lived full of integrity, honesty and openness!

Funding that made research possible has been generously given by the following:

- 2003, Keith and Dorothy MacKay Travelling Scholarship for travel to attend the Society of Pidgin and Creole Linguistics Conference in Hawai'i and deliver the paper, 'Morpho-syntactic substrate influence in Kriol';
- 2003, DAC funded final field trip to Roper River region in the Northern Territory;
- 2001-2004, University of New England postgraduate assistance;
- 2001, Language Access Initiative Program, Aboriginal and Torres Strait Islander Commission grant through DAC, for production of booklets based on tapes collected during AIATSIS grant and used for this thesis;
- 1998, AIATSIS grant no G97/6053 for initial collection of tapes used as data for this thesis.

The Northern Territory Archive Service in Darwin was really helpful in accessing archival material for chapter 2 in 2000 and in gaining approval to use the material from the Church Missionary Society – thanks to both organisations. The NLC was also very generous in allowing me to use a selection of resources collected during the St. Vidgeon Pastoral Lease Native Title Claim in 1998–1999, again for use in chapter 2.

Many thanks to Fern and Sue, who came on the scene just in the nick of time for proofreading and positive thinking! Luke – my very talented and supportive nephew – Lynam, the maps are just right; thanks, it was a life-saver.

Thanks to friends and family who've put up with various emotional states over the years and for putting me up on my various travels across the country to carry out this work – especially my Armidale friends: Mick & Marie, Faye & Cath, Zoë & Kev, Paul & Julie, Brett & Karan and Cindy, during visits to the University of New England; my Brisbane friends and family, Gayle & John, Tom & Lorna, Tony & Julia, Luke and Doreen & Nanny for en route stopovers; and Darwin friends, Di, Barb, Cath (good luck with your PhD too!) and Wendy for same. Thanks to Nicole and the Stanthorpe Art Gallery for relief from it all. Scott, Nev, Bill, Dad, Uncle Ron, the LeMays and Doreen, I just can't thank you enough for really being there for me in the last couple of years; it really made the difference – I'm so pleased I came home.

It's been a long road we've travelled and I could not have done it without you David, especially as you fixed the flats, nursed the dog bites, rescued puppies from floodwaters, prepared for cyclones and picked millions of apples just to get us here. I love you and the life we've had together.
