

5.5 Kingsgrove

The Kingsgrove final sample contained a large proportion of male long-term residents. A comparatively high proportion of respondents, by comparison with other CDs, earned in excess of \$1,000 per week, possibly because they worked long hours (62.5% in the paid workforce generally worked at least 40 hours per week). Home ownership levels were also comparatively high. Respondents from Kingsgrove occupied the middle ground with respect to age and household size and the majority who were immigrants were of long-standing.

Kingsgrove respondents were less likely than others to use the internet at home and were least likely, after Roselands respondents, to own a mobile phone. This sub-sample had the largest proportion who had received no further qualifications after leaving school.

In summary, Kingsgrove respondents represented traditional working class post-World War II Australian families. Respondents differed from the general population of this CD primarily in that the large proportion of immigrants who spoke languages other than English were substantially under-represented. In the 2001 Census, this CD had the smallest proportion of persons who spoke English only by comparison with the other survey locations. Elderly people were also under-represented here, quite possibly in part due to lack of proficiency in English.

Table A 5-10: Kingsgrove – Final sample by gender and age

(Sources: ABS 2002; author's fieldwork)

Age	2001 Census results – sample CDs %			2002 survey – final sample %		
	Males	Females	Persons	Males	Females	Persons
20 – 39 years	17.7	19.3	37.0	13.3	10.0	23.3
40 – 59 years	13.7	16.2	30.0	33.3	20.0	53.3
60 years or more	15.4	17.7	33.0	13.3	10.0	23.3

At work (as % of total employed 15+ years of age)	29.3	72.2

* excluding dependent students and non-dependent children, and visitors

5.6 Maroubra

On average, Maroubra respondents were comparatively young (only the final sample from Collaroy Plateau had a lower average age) and were more representative of the age range within the CD than any other sample CD (refer to Tables 5-1 and 5-12). Anecdotal reports of the recent attack and attempted strangulation of an elderly woman within the survey location CD by two young girls were widespread. This event, whether real or suspected, could have been one reason for many elderly people in this CD refusing to participate in the survey.

Although a smaller proportion (81.3%) of respondents from Maroubra were homeowners by comparison with the other sample CDs, this was larger than home ownership levels within the CD at the time of the 2001 Census (Table 5-13). Respondents in this area occupied the middle ground in terms of socio-economic status (based on employment, education and income) and use of communication technology. Maroubra had the largest proportion of participants who used the internet at work.

In summary, the Maroubra sample was representative of the young, the middle aged and the elderly; those living in old and new housing; families with children; and households with no children. All these characteristics might be expected in an area in the earlier stages of gentrification such as Maroubra was intended to represent. In addition, short-term residents of less than five years were proportionately represented. This was the single survey location in which all participants spoke English only, demonstrating that migrants from a different language background were under-represented by comparison with the CD's population. This was, of course, a feature of all sample CDs.

Table A 11-8: Responses for acceptance of new and different neighbours

<i>Response options</i>	<i>Number of responses</i>	<i>Valid percent</i>	<i>Condensed responses</i>	<i>Valid percent</i>
<i>Always</i>	48	23.3	<i>Always or mostly</i>	80.1
<i>Mostly</i>	117	56.8		
<i>Sometimes</i>	20	9.7	<i>Sometimes or never</i>	10.2
<i>Never</i>	1	0.5		
<i>Not sure</i>	20	9.7	<i>Not sure</i>	9.7
<i>Total valid responses</i>	206	100		100
<i>No response</i>	1			

Table A 11-9: Responses for recent civic participation

<i>Response options – not condensed</i>	<i>Number of responses</i>	<i>Valid percent</i>
<i>Yes</i>	76	36.7
<i>No</i>	131	63.3
<i>Total valid responses</i>	207	100
<i>No response</i>	–	

Table A 11-10: Responses for recent social participation

<i>Response options – not condensed</i>	<i>Number of responses</i>	<i>Valid percent</i>
<i>Yes</i>	104	50.2
<i>No</i>	103	49.8
<i>Total valid responses</i>	207	100
<i>No response</i>	–	

Table A 11-11: Responses for neighbours generally only interested in self

<i>Response option – to place a mark at one point along a line that best represents their view</i>	<i>Condensed responses</i>	<i>Number of responses</i>	<i>Valid percent</i>
<i>Mark placement scored as 0 – 40</i>	<i>Generally yes</i>	92	44.7
<i>Mark placement scored as 41 – 60</i>	<i>Indeterminate</i>	76	36.9
<i>Mark placement scored as 61 – 100</i>	<i>Generally no</i>	38	18.4
<i>Total valid responses</i>		206	100
<i>No response</i>		1	

Table A 11-12: Responses for neighbours would volunteer neighbourhood help

<i>Response option – to place a mark at one point along a line that best represents their view</i>	<i>Condensed responses</i>	<i>Number of responses</i>	<i>Valid percent</i>
<i>Mark placement scored as 0 – 40</i>	<i>Generally yes</i>	84	40.8
<i>Mark placement scored as 41 – 60</i>	<i>Indeterminate</i>	94	45.6
<i>Mark placement scored as 61 – 100</i>	<i>Generally no</i>	28	13.6
<i>Total valid responses</i>		206	100
<i>No response</i>		1	

APPENDIX 12: Z-SCORES FOR LOCATIONAL DIFFERENCES

Table A 12-1: Selected responses for neighbourhood identification

<i>Criteria for identification with neighbourhood</i>	<i>Survey location responses – Z-scores</i>					
	<i>Collaroy Plateau</i>	<i>River-view</i>	<i>Strath-field</i>	<i>Rose-lands</i>	<i>Kings-grove</i>	<i>Maroubra</i>
<i>“Home” is where they live</i>	-0.14	1.35	0.22	-1.54	-0.54	0.65
<i>Very or somewhat unhappy to move</i>	1.29	0.61	0.22	-1.46	-0.86	0.22
<i>Definitely or probably won’t move:</i>						
<i>within 6 months</i>	0.11	0.06	0.25	1.58	-1.46	-0.54
<i>within 5 years</i>	0.08	0.25	1.06	-1.31	0.98	-1.06
<i>Quite often/occasionally share interests</i>	0.93	0.51	1.07	-1.45	-0.73	-0.33
<i>Travel away:</i>						
<i>for work</i>	0.99	-0.86	1.07	-1.42	-0.12	0.33
<i>10km or more for mainstream pursuit</i>	-1.11	-0.64	0.42	1.46	0.66	-0.80
<i>Combined result (Z-score)</i>	2.16	1.29	4.30	-4.14	-2.08	-1.54

Table A 12-2: Selected responses for neighbourhood interaction

<i>Criteria for neighbourly interaction</i>	<i>Survey location responses – Z-scores</i>					
	<i>Collaroy Plateau</i>	<i>River-view</i>	<i>Strath-field</i>	<i>Rose-lands</i>	<i>Kings-grove</i>	<i>Maroubra</i>
<i>People always or mostly get along</i>	0.82	-0.10	0.55	-1.85	-0.16	0.75
<i>People often exchange favours</i>	0.60	0.54	0.36	-1.77	0.85	-0.59
<i>Know adults in at least 10 households</i>	1.29	0.59	0.33	-1.59	-0.03	-0.59
<i>Combined result (Z-score)</i>	2.71	1.03	1.24	-5.22	0.66	-0.43

Table A 12-3: Selected responses for satisfaction and safety

<i>Criteria for satisfaction and safety</i>	<i>Survey location responses %</i>					
	<i>Collaroy Plateau</i>	<i>River-view</i>	<i>Strath-field</i>	<i>Rose-lands</i>	<i>Kings-grove</i>	<i>Maroubra</i>
<i>Very or somewhat satisfied with neighbourhood</i>	0.80	0.31	0.61	-1.95	-0.07	0.29
<i>Always or mostly feel safe walking in street after dark</i>	0.41	1.21	0.11	-1.83	-0.08	0.18
<i>Think neighbourhood is very or mostly safe</i>	0.77	0.62	0.10	-1.92	-0.13	0.56
<i>Combined result (Z-score)</i>	1.97	2.14	0.82	-5.69	-0.27	1.03

Table A 12-4: Selected responses for social capacities and civic qualities

<i>Criteria for social capacities and civic qualities</i>	<i>Survey location responses %</i>					
	<i>Collaroy Plateau</i>	<i>River-view</i>	<i>Strath-field</i>	<i>Rose-lands</i>	<i>Kings-grove</i>	<i>Maroubra</i>
<i>Generally trust neighbours %</i>	1.12	1.01	0.38	-1.41	-0.51	-0.59
<i>Often or occasionally greet familiar faces %</i>	0.72	-0.29	0.74	-1.89	0.29	0.43
<i>Neighbour usually or sometimes collects mail %</i>	0.99	1.38	0.12	-0.80	-0.95	-0.74
<i>Usually or sometimes leave key with neighbour %</i>	0.27	1.16	-0.01	-1.62	-0.59	0.78
<i>Different/new neighbour would be accepted %</i>	0.62	0.43	0.44	-1.41	-1.10	1.02
<i>Participated in civic affairs %</i>	-0.22	1.78	0.33	-0.49	-0.22	-1.17
<i>Volunteered unpaid help %</i>	0.95	0.79	0.15	-1.43	0.58	-1.03
<i>Assessment of neighbours –Mean rating:</i>						
<i>Generally motivated by self interest %</i>	0.66	0.56	-0.80	-1.68	0.66	0.59
<i>Generally prepared to volunteer help %</i>	1.16	0.98	0.15	-1.53	-0.52	-0.23
<i>Combined result (Z-score)</i>	6.27	7.80	1.50	-12.26	-2.36	-0.95

APPENDIX 13: LOCATIONAL DIFFERENCES – DISPERSAL OF SOCIAL NETWORKS

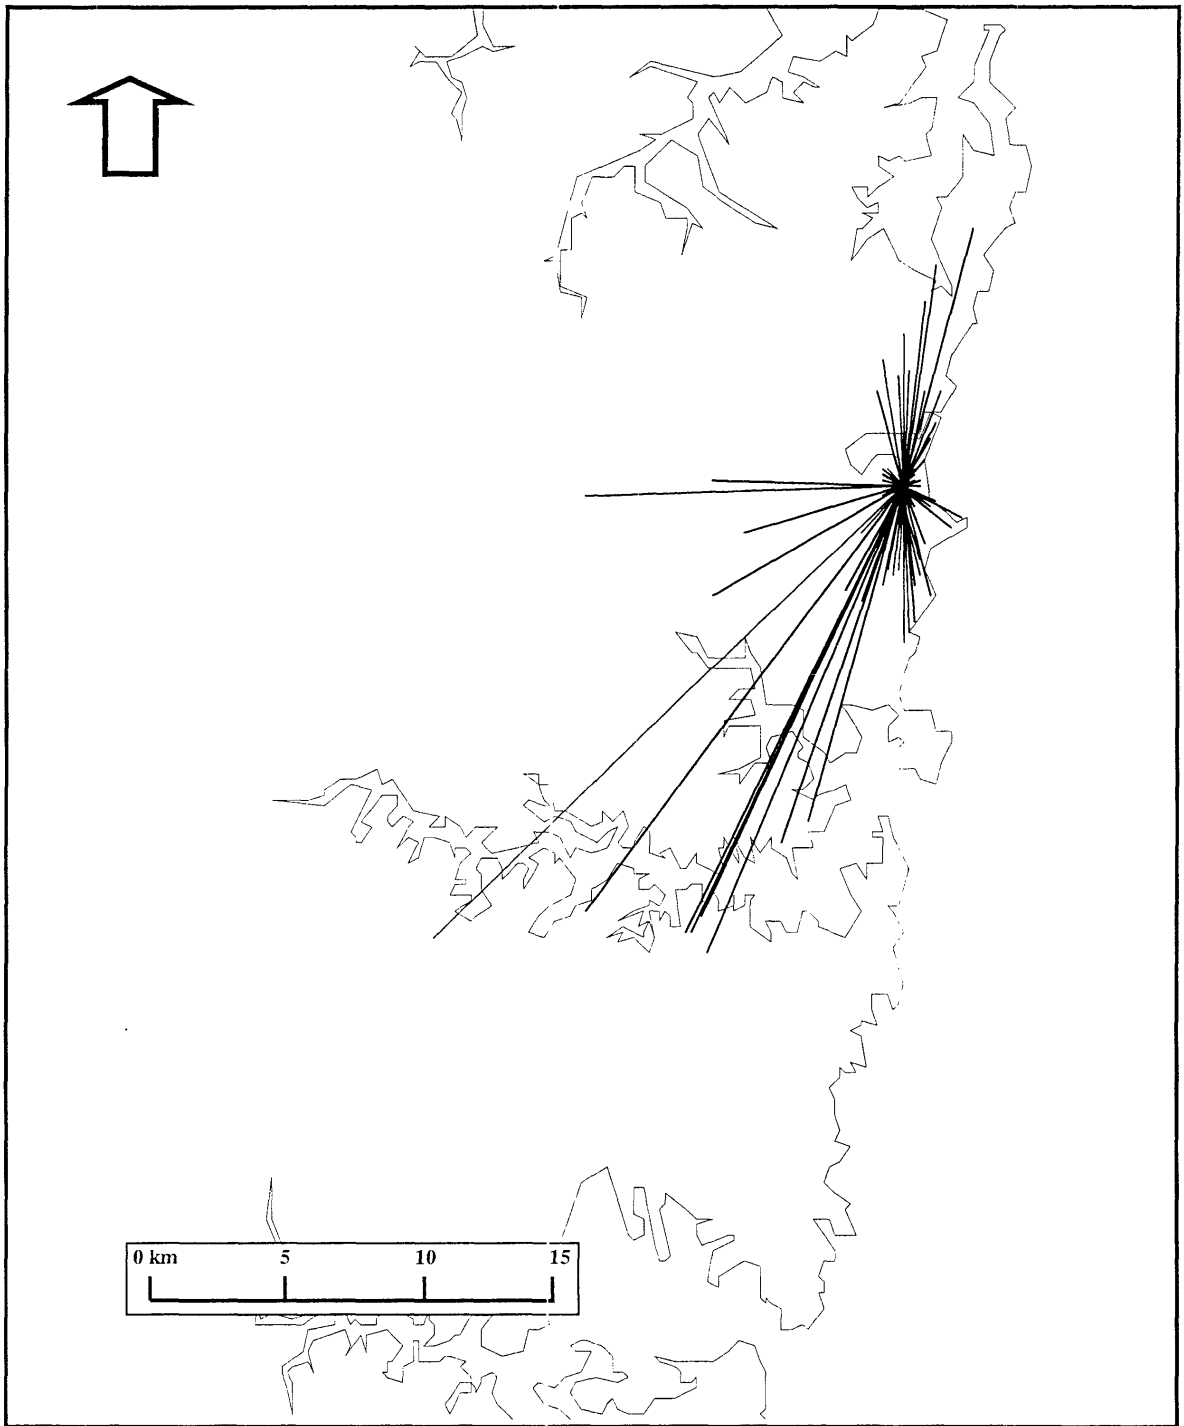

Figure A 13-1: Dispersal of group memberships outside local areas – Collaroy Plateau
