 Appendix V A-111  
 Application of the Keys 3-34  
 Applications - Guidelines for Feeding Habitat 2-48  
 Area and vegetation distances in greenshank roost sample 6-48  
 Area Attributes (Ch 2 Guidelines for Feeding Habitat) 2-39  
 Assigning Guide Values methods (Roosting Habitat) 6-15  
 Attributes of flat used in example assessment A-111  
 Author's Statement ii

## **B**ar-tailed Godwit, Diff's between roosts used and not 6-31

Bar-tailed Godwit (Feeding Habitat Assessment Model) 3-8  
 Bar-tailed Godwit (Food Resources) 5-35  
 Bar-tailed Godwit (Discussion - feeding habitat) 1-34  
 Bar-tailed Godwit (feeding habitat) 1-18  
 Bar-tailed Godwit and habitat variables, Significance of regressions between 1-20  
 Bar-tailed Godwit Feeding habitat assessment key 3-10  
 Bar-tailed Godwit habitat Guide values to aim for when conserving 2-12  
 Bar-tailed Godwit Habitat Suitability Mean Model 2-11  
 Bar-tailed Godwit mean model.Regr. comp's for testing 2-13  
 Bar-tailed Godwit range models Performance of 3-11  
 Bar-tailed Godwit roosts, Guide values for the management of 6-33  
 Bar-tailed Godwit Roosts (Discussion) 6-71  
 Bar-tailed Godwit use of roost type 6-30  
 Bar-tailed Godwit Use of Roosting Habitat 6-29  
 Biomass, Total & Surface 5-15  
 Bird numbers used in the habitat suitability and conservation value classes 2-11  
 Black-tailed Godwit Use of Roosting Habitat 6-59

## **C**ensus methods (Ch 4 Nocturnal Use) 4-4

Chapter 1 1-3  
 Chapter 2 2-3  
 Chapter 3 3-3

Chapter 4 4-3  
 Chapter 5 5-3  
 Chapter 6 6-3  
 Characteristics of shorebirds used for noct. identification. 4-7  
 Characteristics of the habitat variables 1-13  
 Clean Sand (Roost Construction) A-89  
 Co-occurrence, Significance levels of shorebird species 1-28  
 Co-occurrence of less common shorebird species, Significance levels of 1-31  
 Coastal Development and Roosting Shorebirds 6-3  
 Collective guidelines for management of shorebird roosts 6-75  
 Collective Guidelines for Species with Fewer Roosts 6-60  
 Collective Guidelines Roosts (Discussion) 6-74  
 Comp's between food groups relating to shorebird species 5-27  
 Comp. Shorebird Numbers on Feeding Flats Day and Night 4-10  
 Comparing Diurnal and Nocturnal Foraging Effort 4-16  
 Comparison of habitat needs of the six modelled species and species number 1-40  
 Composite guide values based on max. values of the 6 modelled spp. 2-34  
 Composite Guidelines (feeding habitat) 2-33  
 Concept of Guidelines for Feeding Habitat 2-48  
 Conclusion 7-13  
 Conflicting Habitat Needs (Discussion - feeding habitat) 1-39  
 Conflicts of Interest (Feeding Habitat) 2-54  
 Conservation Value Classes 2-11  
 Conservation Value Classes (Discussion) 3-32  
 Conservation Value Classes Bar-tailed Godwit 3-8  
 Conservation Value Classes Eastern Curlew 3-14  
 Conservation Value Classes Whimbrel 3-11  
 Conserving Feeding Habitat (General Conclusions) 7-6  
 Conserving Migratory Shorebird Habitat 7-3  
 Conserving Peripheral Wetlands (General Conclusions) 7-12  
 Conserving Roost Sites (General Conclusions) 7-8  
 Constructed perches, Dimensions of 6-47  
 Constructing Feeding Habitat (General Conclusions) 7-6  
 Constructing Peripheral Wetlands (General Conclusions) 7-13  
 Constructing Sh'bird Roosting Areas (General Conclusions) 7-9  
 Construction - use of Guidelines for Feeding Habitat 2-52  
 Construction of intertidal feeding habitat. Recommended ranges of attributes for 2-35  
 Construction of Shorebird Feeding Habitat - Application of assessment keys 3-35  
 Construction Specifications (feeding habitat) 2-33  
 Contents in Brief xi  
 Contents: Appendices A-1  
 Correlations among elevation measures 2-24  
 Correlations among food groups 5-12  
 Correlations among food groups and env. attributes 5-16  
 Correlations among habitat variables 1-16  
 Costs (Roost Construction) A-91  
 Cover (Food Resources) 5-31  
 Cover by Structures (manag. of substrate & elevation) A-60  
 Cover by Structures (impacts of) A-34  
 Cover by Structures (management of) A-48  
 Cover estimation A-10  
 Crustacean Biomass 5-15  
 Crustacean Biomass and shorebirds 5-25  
 Curlew Sandpiper Use of Roosting Habitat 6-56

## **D**eposition (manag. of water) A-61

Depths to which shorebird species waded at roost 6-42  
 Design Concepts (Roost Construction) A-83  
 Development & Approval Processes (Roost Construction) A-101  
 Development distances in godwit roost sample 6-32  
 Dimensions of constructed perches 6-47  
 Direct Intertidal Flat Loss (impacts of) A-20  
 Direct Intertidal Flat Loss (management of) A-41  
 Discussion (Food Resources) 5-28  
 Discussion (Ch 4 Nocturnal Use) 4-18  
 Discussion (Ch 1- feeding habitat use) 1-32  
 Discussion (Ch. 6: Roosting Habitat) 6-63  
 Discussion (Feeding Habitat Assessment Models) 3-26  
 Disease Manag. (Further Reading) A-67  
 Dissimilarity diagram of food groups 5-13  
 Dissolved Oxygen (management of veg.) A-54  
 Dissolved Oxygen Decreased (impacts of) A-30  
 Distrib. of Isopod/ Amphipod biomass in rel. to salinity 5-20  
 Disturbance of Roost Sites 6-21  
 Disturbance (Further Reading) A-40  
 Disturbance (management of) A-44  
 Disturbance (Roost Construction) A-80  
 Disturbance Buffer Distances (feeding habitat discussion) 2-46  
 Disturbance Buffer Distances (methods) 2-9  
 Disturbance Distances (Ch 2 Guidelines for Feeding Hab.) 2-36  
 Disturbance distances and recomm. minimum buffer sizes 2-36  
 Disturbance levels in roost sample 6-28  
 Disturbance levels on roost types 6-28  
 Disturbance Manage. - Further Reading (Roost Constr.) A-108  
 Disturbance Management (Further Reading) A-67  
 Disturbance management (Table) A-45  
 Disturbance Management (Roosts) A-99  
 Disturbance Regime Descriptors methods (Roosting Hab.) 6-11  
 Disturbance Regime Descriptors Roost Attrib's (Discuss.) 6-68  
 Disturbance (impacts of) A-26  
 Dredge Spoil (Roost Construction) A-89

## **E**astern Curlew, Feeding habitat assessment key for 3-15

Eastern Curlew, Differences between roosts used and not 6-37  
 Eastern Curlew (Feeding Habitat Assessment Models) 3-14  
 Eastern Curlew (Food Resources) 5-35  
 Eastern Curlew (feeding habitat) 1-21  
 Eastern Curlew (Discussion - feeding habitat) 1-36  
 Eastern Curlew and habitat variables, Significance of regressions between 1-22  
 Eastern Curlew Comparison of area guide values from the two samples 2-20  
 Eastern Curlew habitat Guide values to aim for when conserving 2-18  
 Eastern Curlew mean model, Regr. comps for testing 2-19  
 Eastern Curlew range model, Performance of 3-16  
 Eastern Curlew roosts, Guide values for the manage. of 6-39  
 Eastern Curlew Roosts (Discussion) 6-71  
 Eastern Curlew use of roost type 6-35  
 Eastern Curlew Use of Roosting Habitat 6-34  
 Eastern Curlew Habitat Suitability Mean Model 2-17  
 Ecotourism A-97  
 Effect of Ambient & Moon light, on Numbers at Night 4-10  
 Effects of Roost Loss A-76  
 Elevation (Food Resources) 5-29  
 Elevation (feeding habitat) 1-17  
 Elevation (Further Reading) A-38  
 Elevation Attributes (Ch 2 Guidelines for Feeding Habitat) 2-42  
 Elevation height guide values for constr. of feeding hab. 2-38  
 Elevation Heights (methods) 2-9  
 Elevation Profile (feeding habitat - Methods) 1-9  
 Elevation Profile (impacts of) A-24

Elevation Profile (management of) A-57  
 Elevation Profile Levels 2-37  
 Elevation Profile Measurement Techniques A-10  
 Engineering Requirements (Roost Construction) A-86  
 Enhancement of Shorebird Feeding Habitat - Application of assessment keys 3-35  
 Enhancement of Shorebird Feeding Habitat - use of Guidelines 2-52  
 Environmental Impact (Roost Construction) A-92  
 Environmental Impact Assessment - use of Guidelines for Feeding Habitat 2-50  
 Environmental Impact Assessment - Application of assessment keys 3-34  
 Environmental Impact Assessment and Monitoring (Further Reading) A-65  
 Environmental Needs of Shorebird Food 5-28  
 Erosion (manag. of water) A-61  
 Erosion and Deposition (manag. of substrate & elevation) A-57  
 Erosion and Deposition (management of veg.) A-51  
 Erosion and Deposition (impacts of) A-22  
 Erosion and Deposition (management of) A-42  
 Estuaries - General (Further Reading) A-36  
 Estuarine Environment, The (Discussion) 1-32  
 Estuarine Environment, The 1-12  
 Estuarine Management for Shorebirds A-16  
 Estuary Descriptors (feeding habitat - Methods) 1-9  
 Estuary Effect (feeding habitat - Methods) 1-11  
 Estuary-wide Attributes (Food Resources) 5-28  
 Estuary-wide Attributes (feeding habitat) 1-18  
 Example assessments of an intertidal flat using the keys (after Lawler 1995) A-111  
 Example of mean model development - Bar-tailed Godwit plotted against Area 2-7  
 Example of range model - Bar-tailed Godwit plotted against area 3-5  
 Example of Use for Environmental Impact Assessment A-111  
 Existing Management Guidance 6  
 Experimental Design 1-5

## **F**eeding habitat assessment key for 3+ species number 3-25

Feeding habitat assessment key for Bar-tailed Godwit 3-10  
 Feeding habitat assessment key for Eastern Curlew 3-15  
 Feeding habitat assessment key for Greenshank 3-18  
 Feeding habitat assessment key for Pacific Golden Plover 3-23  
 Feeding habitat assessment key for Pacific Golden Plover (model I) 3-22  
 Feeding habitat assessment key for Tattler 3-20  
 Feeding habitat assessment key for Whimbrel 3-13  
 Figures in Appendices - see table of appendices contents A-1  
 Food, Environmental Needs of Shorebird 5-28  
 Food Groups 5-6  
 Food Groups & Shorebirds, Links Between (Discussion) 5-32  
 Food Resource 5-9  
 Food Resource and Shorebirds, Relationships Between the 5-22  
 Foraging actions day & night, Mean numbers of shorebird 4-17  
 Foraging actions day and night, Significances of comparisons of shorebird 4-17  
 Foraging actions used to measure foraging effort 4-7  
 Foraging Effort, Comparing Diurnal and Nocturnal 4-16  
 Foraging Effort methods (Ch 4 Nocturnal Use) 4-8  
 Foreshore Roosts (Roost Construction) A-86  
 Funding (Roost Construction) A-91  
 Further Reading (management) A-64  
 Further Reading (Roost Construction) A-106

**G**eneral Conclusions: 7-3  
 General Discussion (Ch 2 Guidelines for Feeding Habitat) 2-38  
 General Fill (Roost Construction) A-89  
 General Introduction 3  
 General Management Guidelines (Food Resources) 5-37  
 General Method (Ch 1- feeding habitat use) 1-4  
 General Method (Ch 2 Guidelines for Feeding Habitat) 2-4  
 General Method (Ch. 6: Roosting Habitat) 6-6  
 General Method (Ch 3 Assessment of Feeding Habitat) 3-4  
 General Principles (Roost Construction) A-102  
 Generalised guidelines for management of roosts used by other species 6-62  
 Geographic Modelling 12  
 Ghost Shrimp Biomass 5-19  
 Ghost Shrimp Biomass and shorebirds 5-25  
 Godwit number vs. distance to roost A-77  
 Greenshank, Feeding habitat assessment key for 3-18  
 Greenshank, Differences between roosts used & not 6-47  
 Greenshank (feeding habitat) 1-23  
 Greenshank (Food Resources) 5-37  
 Greenshank (Discussion - feeding habitat) 1-37  
 Greenshank (Feeding Habitat Assessment Models) 3-16  
 Greenshank and habitat variables, Significance of regressions between 1-23  
 Greenshank hab. Guide values to aim for when conserving 2-22  
 Greenshank Habitat Suitability Mean Model 2-20  
 Greenshank mean model, Regression comps for testing 2-23  
 Greenshank range model, Performance of 3-18  
 Greenshank roosts, Guidelines for the management of 6-49  
 Greenshank Roosts (Discussion ) 6-72  
 Greenshank use of roost type 6-45  
 Greenshank Use of Roosting Habitat 6-44  
 Guide Value, The (feeding habitat) 2-38  
 Guide values for management of Bar-tailed Godwit roosts 6-33  
 Guide values for the management of Eastern Curlew roosts 6-39  
 Guide values to aim for when conserving Bar-tailed Godwit habitat 2-12  
 Guide values to aim for when conserving Eastern Curlew habitat 2-18  
 Guide values to aim for when conserving Greenshank hab. 2-22  
 Guide values to aim for when conserving habitat for high spp. number 2-31  
 Guide values to aim for when conserving Tattler habitat 2-25  
 Guide values to aim for when conserving Whimbrel hab. 2-14  
 Guidelines, General Management (Food Resources) 5-40  
 Guidelines for Assessment of Shorebird Feeding Habitat 3-1  
 Guidelines for Protection & Provision of Shorebird Feeding Habitat 2-1  
 Guidelines for Roost Management 6-1  
 Guidelines for Shorebird Food Resources 5-1  
 Guidelines for the management of Greenshank roosts 6-49  
 Guidelines for the Management of Migratory Shorebird Hab. 3  
 Guidelines for the management of Tattler roosts 6-53  
 Guidelines for the management of Whimbrel roosts 6-43

**H**abitat Area (Food Resources) 5-29  
 Habitat Fragmentation (impacts of) A-20  
 Habitat Fragmentation (manag. of substrate & elevation) A-57  
 Habitat Fragmentation (manag. of substrate & elevation) A-57  
 Habitat Fragmentation (management of) A-41  
 Habitat Fragmentation (management of) A-41  
 Habitat Loss - Further Reading (Roost Construction) A-107  
 Habitat Loss - Further Reading (Roost Construction) A-107  
 Habitat Management Needs (Discussion - feeding habitat) 1-41  
 Habitat Management Needs (General Conclusions) 7-1

Habitat Modelling 10 (see also Predicting Shorebirds 3-26)  
 Habitat Needs (Roost Construction) A-73  
 Habitat Suitability Mean Models 2-10  
 Habitat Use by Species with Fewer Roosts 6-54  
 Habitat Values (Guide Values) 2-38  
 Habitat variables, Characteristics of the 1-12  
 Habitat Variables (feeding habitat - methods) 1-7  
 Habitat Variables methods (Ch. 6: Roosting Habitat) 6-8  
 Hardness measurement A-11  
 Height and distance to barriers (Roost Construction) A-79  
 Height and distance to barriers (Roost Attributes) 6-66  
 Hydrogen Sulphide (Food Resources) 5-31  
 Hydrogen Sulphide (impacts of) A-31

**I**dentification methods (Ch 4 Nocturnal Use) 4-6  
 Identifying Habitat Attributes Selected by Shorebird Species methods (Roosting Habitat) 6-14  
 Identifying the Problem A-17  
 Impacts - Further Reading A-36  
 Impacts A-20  
 In Wetland (Roost Construction) A-83  
 Increased Area (impacts of) A-25  
 Increased Area (management of) A-43  
 Interpretive Structures A-90  
 Interrelationships between habitat attributes 1-15  
 Intertidal Feeding Habitat (General Conclusions) 7-4  
 Introduction (Ch 2 Guidelines for Feeding Habitat) 2-3  
 Introduction (Ch 1- feeding habitat use) 1-3  
 Introduction (Ch 4 Nocturnal Use) 4-3  
 Introduction (Ch. 5 Food Resource) 5-3  
 Introduction (Gen. Concl. Conserving Habitat) 7-3  
 Introduction (Ch 3 Assessment of Feeding Habitat) 3-3  
 Introduction (Ch. 6: Roosting Habitat) 6-3  
 Invertebrate size class boundaries 5-6  
 Invertebrates (manag. of substrate & elevation) A-58  
 Invertebrates 5-9  
 Invertebrates (Further Reading) A-39

 Invertebrates Manag. (Further Reading ) A-68  
 Isopod & Amphipod Biomass 5-19  
 Isopod & Amphipod Biomasses and shorebirds 5-25  
 Issues Addressed by Research 4

**J**urisdiction (Roost Construction) A-97  
 Juncaceae as natural datum 2-9

**K**nots, Use of Roosting Habitat 6-58  
 Knots and moonlight 4-10

**L**andform for roosting by Bar-tailed Godwit Use of 6-30  
 Landform for roosting by Eastern Curlew 6-35  
 Landform for roosting by Greenshank 6-45  
 Landform for roosting by Tattler 6-51  
 Landform for roosting by Whimbrel 6-41  
 Landforms in roost sample 6-17  
 Landscaped Shore (Roost Construction) A-83

Less Abundant Species (feeding habitat) 1-22  
 Less Abundant Species (Methods - Assessment Models) 3-6  
 Less Abundant Species (Feeding Hab. Assess. Models) 3-16  
 Less Abundant Species Habitat Suitability Mean Models 2-20  
 Lesser/Greater Sand Plover Use of Roosting Habitat 6-54  
 Limitations of research approach 1-5, 1-43  
 Limitations of the Assessment Models 3-31  
 Limitations of the Guidelines Models (Ch 2) 2-48, 2-53  
 Links Between Shorebirds & Food Groups, Discussion 5-34  
 List of Figures xix  
 List of Plates xxii  
 List of Tables xx  
 Locations of the 9 estuaries used in the modelling 1-6  
 Locations of the 13 estuaries used in model testing 2-8  
 Logistics (Roost Construction) A-92  
 Loss of Fringing Vegetation (management of veg.) A-51  
 Loss of Fringing Vegetation (impacts of) A-22

**M**aintenance (Roost Construction) A-100  
 Management (Roost Construction) A-97  
 Management Guidelines, need of (Roosting Habitat) 6-6  
 Management of Protected Areas - Application of assessment keys 3-36  
 Management of Estuaries and Protected Areas - use of Guidelines for Feeding Habitat 2-51  
 Mangrove cover in curlew roost sample 6-39  
 Mangrove Loss (management of veg.) A-50  
 Mangrove Loss (impacts of) A-21  
 Mangrove roost trees used by Tattler, Characteristics of 6-50  
 Mangrove trees, roost, used by Whimbrel 6-44  
 Mangroves (Feeding Habitat) 2-40  
 Mangroves (Further Reading) A-37  
 Marsh Sandpiper Use of Roosting Habitat 6-57  
 Materials And Costs (Roost Construction) A-89  
 Matrix of threats and impacts A-18-19  
 Mean model development - Eastern Curlew 2-17  
 Mean model development - Greenshank 2-20  
 Mean model development - Pacific Golden Plover 2-26  
 Mean model development - species number 2-29  
 Mean model development - Tattler 2-24  
 Mean model development - Whimbrel 2-14  
 Measurement Techniques A-8  
 Measurement Techniques References A-14

 Results (Food Resources) 5-9  
 Results (Ch 3 Assessment of Feeding Habitat) 3-8  
 Results (Ch. 6: Roosting Habitat) 6-15  
 Results and Discussion (Ch 2 Guidelines for Feeding Hab) 2-10  
 Rock (Roost Construction) A-89  
 Roost attributes, Correlations among 6-23  
 Roost Attributes (Discussion) 6-63  
 Roost characteristics, Summary values of 6-18

Roost co-use, Correlations of 6-25  
 Roost Construction A-70  
 Roost Construction (Guidelines) A-78  
 Roost types in sample 6-17  
 Roosting Environment, The 6-15  
 Roosting Habitat (General Conclusions) 7-8  
 Roosting Habitat Species with Fewer Roosts 6-54  
 Roosts, Collective guidelines for management of shorebird 6-74  
 Roosts and their Role in the Tidal Routine 6-4  
 Roosts used by less commonly occurring species, Summary of attributes of 6-61  
 Roosts used by other species, Generalised guidelines for management of 6-62  
 Roughness (impacts of) A-26  
 Roughness (manag. of substrate & elevation) A-58  
 Ruddy Turnstone Use of Roosting Habitat 6-60

**S**alinity (Food Resources) 5-31  
 Salinity & Shorebirds 2-44  
 Salinity (Further Reading) A-38  
 Salinity Changes (impacts of) A-27  
 Salinity Changes (manag. of water) A-61  
 Salinity Changes (management of veg.) A-52  
 Salinity Manag. (Further Reading) A-67  
 Sample of literature (Food Resources) 5-4  
 Sampling (Further Reading) A-69  
 Sampling (invertebrates) 5-5  
 Sampling methods (Ch. 6: Roosting Habitat) 6-7  
 Scale 5  
 Seagrass (correlation with food resource) 5-33  
 Seagrass & Tattler 1-38  
 Seagrass (Further Reading) A-37  
 Seagrass Loss (manag. of substrate & elevation) A-57  
 Seagrass Loss (management of veg.) A-50  
 Seagrass Loss (impacts of) A-22  
 Sediments (Food Resources) 5-30  
 Selection of Protected Areas - Appl. of assessment keys 3-36  
 Selection of Relevant Hab. Variables (Assessment Models) 3-4  
 Selection of Relevant Habitat Variables (Ch 2 Guidelines for Feeding Habitat) 2-5  
 Shape, Shoreline Length or Position (impacts of) A-25  
 Shape (management of) A-41  
 Shape (management of) A-43  
 Shape Measurement Techniques A-8  
 Shape (manag. of substrate & elevation) A-58  
 Shape (manag. of water) A-61  
 Sharp-tailed Sandpiper Use of Roosting Habitat 6-56  
 Shelter (Roost Construction) A-80  
 Shorebird Counts 1-6  
 Shorebird Food (Further Reading) A-39  
 Shorebird Food Resource 5-9  
 Shorebird names A-7  
 Shorebird Numbers & Spp Number (Food Resources) 5-34  
 Shorebird Roosts and their Role in the Tidal Routine 6-4  
 Shorebird Species Number (Feeding Habitat Assessment Models) 3-23  
 Shorebird Use of the Estuarine Environment 1-18  
 Shorebird Use of the Estuarine Environment (Discussion) 1-33  
 Shorebird Use of the Roost Sites 6-22  
 Shorebirds - Further Reading (Roost Construction) A-106  
 Shorebirds - General (Further Reading) A-37  
 Shoreline Length (management of) A-43  
 Shoreline Length (manag. of substrate & elevation) A-58  
 Shoreline Length (manag. of water) A-61  
 Significance Level (Chapter 5) 5-8

Significance Level (feeding habitat - Methods) 1-10  
 Significance Level methods (Ch 4 Nocturnal Use) 4-9  
 Significance Level methods (Roosting Habitat) 6-13  
 Site Fidelity A-73  
 Size, Shape and Position Variables (feeding hab. - Methods) 1-7  
 Size (management of) A-41  
 Size (Roost Construction) A-81  
 Size and Position (feeding habitat) 1-15, 2-39  
 Size Measurement Techniques A-8  
 Slope (Roost Construction) A-79  
 Small Surface Crustacean Biomass 5-21  
 Small Surface Crustacean Biomass and shorebirds 5-26  
 Social Issues (Roost Construction) A-94  
 Soil and Water pH (impacts of) A-29  
 Soil Texture (manag. of substrate & elevation) A-58  
 Soil Texture (impacts of) A-24  
 Soil textures A-11  
 Species Associations (feeding habitat - Methods) 1-12  
 Species Associations (feeding habitat) 1-30  
 Species Associations (Discussion - feeding habitat) 1-41  
 Species Associations methods (Roosting Habitat) 6-14  
 Species co-occurrence 1-30  
 Species conservation priorities in New South Wales 3-33  
 Species Guidelines Roosts (Discussion) 6-71  
 Species number, Feeding habitat assessment key for 3+ 3-25  
 Species number, Guide values to aim for when conserving habitat for high 2-31  
 Species Number (feeding habitat) 1-25  
 Species Number on Roost Sites 6-22  
 Species number and habitat variables, Significance of regressions between 1-29  
 Species Number Habitat Suitability Mean Model 2-29  
 Species number mean model. Regression comps for testing 2-32  
 Species number range model, Performance of 3-26  
 Species number with vegetation cover on roosts 6-28  
 Species numbers, Frequency distribution of 3-24  
 Species numbers at night with different ambient light, significance levels 4-15  
 Species numbers in roost sample 6-20  
 Species numbers night and day, Significance levels of comparisons between 4-11  
 Species numbers night and day 4-12  
 Species numbers on study estuaries 1-27  
 Species numbers on the sampled roosts 6-26  
 Species Profiles (Discussion) 1-34  
 Species with Fewer Roosts (Discussion) 6-74  
 Spirit of Use - Guidelines for Feeding Habitat 2-49  
 Sponsorship (Roost Construction) A-92  
 Study Sites 1-5  
 Study Sites (Ch 4 Nocturnal Use) 4-4  
 Substrate (Food Resources) 5-30  
 Substrate (feeding habitat) 1-17  
 Substrate (Roost Construction) A-78  
 Substrate Measurement Techniques A-10  
 Substrate Properties (feeding habitat - Methods) 1-8  
 Substrate Properties methods (Roosting Habitat) 6-9  
 Substrate Properties Roost Attributes (Discussion) 6-65  
 Substrate Requirements (Roost Construction) A-88  
 Substrate Type (manag. of substrate & elevation) A-57  
 Summarised guide values for protecting and providing feeding habitat (Abstract) v  
 Summary (Ch. 5 Food Resource) 5-1  
 Summary of attributes of roost used by less commonly occurring species 6-61  
 Summary of model testing results 2-48  
 Summary of shorebird food resources 5-10  
 Summary values of common shorebird species occurrence 1-19  
 Summary values of occurrence of less common shorebird species 1-19

Surrounding Mangrove (Feeding habitat) 2-40  
 Surrounding Mangrove (Food Resources) 5-32

## Table of Contents (full) xii

Tables in Appendices - see table of appendices contents A-1  
 Tattler, Feeding habitat assessment key for 3-20  
 Tattler, Characteristics of roost trees used by 6-50  
 Tattler (Discussion - feeding habitat) 1-38  
 Tattler (Feeding Habitat Assessment Models) 3-18  
 Tattler (feeding habitat) 1-24  
 Tattler (Food Resources) 5-37  
 Tattler analysis, Correlations among additional cover variables for 1-26  
 Tattler and habitat variables, Significance of regressions between 1-24  
 Tattler Habitat Suitability Mean Model 2-24  
 Tattler habitatGuide values to aim for when conserving 2-25  
 Tattler mean model. Regression comparisons for testing 2-26  
 Tattler range model, Performance of 3-20  
 Tattler roosts, Guidelines for the management of 6-53  
 Tattler Roosts (Discussion) 6-73  
 Tattler use of roost type 6-51  
 Tattler Use of Roosting Habitat 6-50  
 Terek Sandpiper Use of Roosting Habitat 6-58  
 Testing the Bar-tailed Godwit Hab. Suitability Mean Mod. 2-12  
 Testing the Eastern Curlew Hab. Suitability Mean Model 2-19  
 Testing the Greenshank Habitat Suitability Mean Model 2-20  
 Testing the Guide Values (feeding habitat) 2-47  
 Testing the Mean Models (methods) 2-8  
 Testing the Pacific Golden Plover Habitat Suitability Mean Model 2-27  
 Testing the Range Model 3-30  
 Testing the Range Model Bar-tailed Godwit 3-11  
 Testing the Range Model Eastern Curlew 3-16  
 Testing the Range Model Whimbrel 3-14  
 Testing the Range Models (Methods) 3-7  
 Testing the Species Number Hab. Suitability Mean Model 2-29  
 Testing the Tattler Habitat Suitability Mean Model 2-26  
 Testing the Whimbrel Habitat Suitability Mean Model 2-16  
 The Estuarine Environment 1-12  
 Tidal Regime (invertebrates) 5-31, 5-40  
 Tidal Regime (manag. of water) A-62  
 Tidal Regime (manag. of substrate & elevation) A-59  
 Tidal Regime (impacts of) A-28  
 Tidal Regime (management of veg.) A-53  
 Tidal Regime (management of) A-46  
 Tidal Regime (Further Reading) A-38  
 Tidal restrictions A-47  
 Tide levels (Roost Construction) A-82  
 Total & Surface Biomass 5-15  
 Total & Surface Biomass and shorebirds 5-22  
 Total Biomass Excluding Large Crustaceans 5-19  
 Total Biomass Excluding Large Crustaceans 5-26  
 Toxicity (impacts of) A-31  
 Toxicity (invertebrates) 5-32, 5-40  
 Toxicity (to Shorebirds) (manag. of water) A-63  
 Toxicity to Invertebrates (management of) A-54  
 Toxicity to Vegetation (management of veg.) A-54  
 Trees, roost, used by Whimbrel 6-44  
 Turbidity Changes (manag. of water) A-64  
 Turbidity Changes (manag. of substrate & elevation) A-60  
 Turbidity Changes (impacts of) A-32, discussion 2-43  
 Turbidity Changes (management of veg.) A-55

**U**se of Feeding Habitat by Migratory Shorebirds 1-3  
 Use of Feeding Habitat (Discussion) 1-18  
 Use of Roosting Habitat by Migratory Shorebirds 6-3  
 Use of Roosting Habitat (Discussion) 6-63  
 Use of Environment by Food Resource 5-15  
 Use of Roosting Habitat by Each Shorebird Species 6-29  
 Using the Guide Values (feeding habitat) 2-48

**V**egetation of Roost Sites 6-16  
 Vegetation (feeding habitat) 1-15  
 Vegetation (management of veg.) A-50  
 Vegetation Attributes (Ch 2 Guidelines for Feeding Hab.) 2-40  
 Vegetation cover, correlation with food resource 5-31  
 Vegetation cover, Frequency distribution of (Roosts) 6-19  
 Vegetation Cover (manag. of substrate & elevation) A-60  
 Vegetation Cover (impacts of) A-34  
 Vegetation Cover (management of veg.) A-56  
 Vegetation Cover (management of) A-48  
 Vegetation distances in godwit roost sample 6-34  
 Vegetation Measurement Techniques A-9  
 Vegetation Variables (feeding habitat - Methods) 1-8  
 Vegetation Variables methods (Roosting Habitat) 6-10  
 Vegetation Variables Roost Attributes (Discussion) 6-66  
 Visual Impact (Roost Construction) A-94

**W**adable zones A-79  
 Waders - see shorebirds  
 Water (Roost Construction) A-80  
 Water Attributes (Ch 2 Guidelines for Feeding Habitat) 2-43  
 Water Depth methods (Roosting Habitat) 6-12

Water Depth Roost Attributes (Discussion) 6-70  
 Water Level (manag. of substrate & elevation) A-60  
 Water Level (impacts of) A-35  
 Water Level (management of veg.) A-56  
 Water Level (management of) A-49  
 Water Properties (feeding habitat - Methods) 1-19  
 Water Properties (feeding habitat) 1-18, 2-43  
 Water Properties (management of) A-61  
 Water Properties Measurement Techniques A-13  
 Wave Climate and Wave Action (manag. of substrate & elevation) A-60  
 Wave Climate and Wave Action (impacts of) A-29  
 Wave Climate and Wave Action (management of veg.) A-53  
 Wave Climate and Wave Action (management of) A-47  
 Wetland Cons. Management Principles (Further Reading) A-64  
 Wetland Conservation - Further Reading (Roost Constr.) A-107  
 Wetland Construct. & Manipulation - Further Reading (Roost Constr.) A-108  
 Wetland Construction and Manipulation (Further Reading) A-66  
 Wetland Roosts (Roost Construction) A-88  
 Whimbrel, Feeding habitat assessment key for 3-13  
 Whimbrel (feeding habitat) 1-20  
 Whimbrel (Feeding Habitat Assessment Models) 3-11  
 Whimbrel Habitat Suitability Mean Model 2-14  
 Whimbrel (Food Resources) 5-37  
 Whimbrel (Discussion - feeding habitat) 1-35  
 Whimbrel and habitat variables, Significance of regressions between 1-21  
 Whimbrel Differences between roosts used and not used by 6-42  
 Whimbrel hab. Guide values to aim for when conserving 2-14  
 Whimbrel mean model. Regression comparisons for testing 2-16  
 Whimbrel roosts, Guidelines for the management of 6-43  
 Whimbrel Roosts (Discussion) 6-72  
 Whimbrel use of roost type 6-40, 41  
 Whimbrel Use of Roosting Habitat 6-40  
 Worm & Large Worm Biomass 5-21  
 Worm & Large Worm Biomass and shorebirds 5-26
