

INSIDE INFORMATION:
SETTLEMENT AND ALLIANCE IN THE LATE HOLOCENE OF
NORTHEASTERN NEW SOUTH WALES

by

Luke Godwin

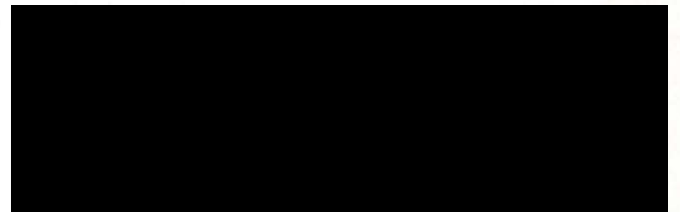

B.A. (Hons), University of New England

July, 1990

A thesis submitted in fulfillment of the requirements for the degree of
Doctor of Philosophy
at the University of New England

I certify that the substance of this thesis has not
already been submitted for any degree
and is not currently submitted for any other degree.

I certify that any help received in preparing this thesis
and all sources used have been acknowledged in this thesis.

Luke Godwin

CONCLUSIONS	

CHAPTER 4	PREVIOUS MODELS OF GROUP MOVEMENT IN NORTHERN NEW SOUTH WALES	67
4.1	MODELS OF GROUP MOVEMENT ON THE NORTH COAST	67
4.1.1	McBryde (1974, 1976 and 1982)	67
4.1.2	Campbell, V. (1978)	73
4.1.3	Coleman (1978 and 1982)	75
4.2	MODELS OF GROUP MOVEMENT ON THE NEW ENGLAND TABLELANDS	80
4.2.1	McBryde (1974 and 1976)	80
4.2.2	Bowdler (1981a) and Bowdler and Coleman (1981)	82
4.2.3	Belshaw (1978)	87
4.3	CONCLUSIONS	88
CHAPTER 5	LINGUISTICS, SOCIAL ORGANISATION AND DEMOGRAPHY	89
5.1	INTRODUCTION	89
5.2	LANGUAGES OF NORTHEASTERN NEW SOUTH WALES	90
5.2.1	Definitions	90
5.2.2	Languages of the North Coast	90
5.2.3	Languages of the New England Tablelands	94
5.2.4	Languages of the Northwestern Slopes	95
5.3	SOCIAL ORGANISATION	96
5.3.1	Introduction	96
5.3.2	The Basic Social Units	97
5.3.3	Land Ownership and Land Use	100
5.4	ESTIMATES OF PREHISTORIC POPULATIONS IN NORTHEASTERN NEW SOUTH WALES	105
5.4.1	Introduction	105
5.4.2	The North Coast	106
5.4.3	The Tablelands	111
CHAPTER 6	AN ALTERNATIVE VIEW OF GROUP MOVEMENT IN NORTHEASTERN NEW SOUTH WALES	115
6.1	INTRODUCTION	115
6.2	GROUP MOVEMENT IN NORTHERN NEW SOUTH WALES	122
6.2.1	The Model	122
6.3	EVIDENCE FOR THE MODEL	123
6.3.1	Seasonality of Occupation	123
6.3.2	References to Movement	128
6.3.3	Intergroup relations	139
6.4	SOCIAL AND LINGUISTIC RAMIFICATIONS	142

CHAPTER 7	SETTLEMENT: PATTERNS AND PREDICTIONS	147
7.1	INTRODUCTION	147
7.2	FOOD: RESOURCES, TECHNOLOGY AND SEASONALITY	147
7.2.1	Faunal Resources	148
7.2.2	Plant Resources of the Gorge Country	162
7.2.3	Plant Resources of the Tablelands	166
7.3	A MODEL OF PREHISTORIC ABORIGINAL EXPLOITATION OF THE REGION	170
7.3.1	The Gorges and Coastal Zone	170
7.3.2	The Tablelands	171

7.4.1	The Gorges	174
7.4.2	The Tablelands	175
CHAPTER 8	ART, AXES AND CEREMONIES: THE ARCHAEOLOGY OF GROUP INTERACTION	177
8.1	INTRODUCTION	177
8.2	SOURCING OF GROUND-EDGE AXES	177
8.3	THE ROCK ART OF NORTHEASTERN NEW SOUTH WALES	183
8.3.1	Review of Rockart in the Region	183
8.4	CEREMONIAL SITES	187
CHAPTER 9	SURVEYS, OPEN SITES AND EXCAVATIONS	191
9.1	INTRODUCTION	191
9.2	THE SURVEYS	191
9.2.1	The Gorge Country	191
9.2.2	The Tablelands	196
9.3	THE EXCAVATIONS	198
9.3.1	Kunderang Brook Rockshelter	198
9.3.2	Saumarez Open Site	210
9.4	RECORDING OF OPEN SITES	214
9.4.1	Artefact Recording Rationale	214
9.4.2	Site Recording	220
CHAPTER 10	ASPECTS OF THE ARCHAEOLOGY OF THE MACLEAY FALLS	230
10.1	INTRODUCTION	230

10.2	CHRONOLOGY	237
10.3	ARTEFACT TAPHONOMY	241
10.4	RATIONING	249
10.4.1	Flakes	249
10.4.2	Cores	274
10.5	TEMPORAL VARIATION	280
10.5.1	Kunderang Brook 2 rockshelter	280
10.5.2	Comparison of sites in colluvial and alluvial contexts	292
10.6	SITE LOCATION: TAPHONOMIC ISSUES	292
10.7	SITE FUNCTION AND STRATEGIC LOCATION	300
10.8	FORAGING AND EMBEDDEDNESS	307
10.9	CONCLUSIONS	313
CHAPTER 11	ASPECTS OF THE ARCHAEOLOGY OF THE NEW ENGLAND TABLELANDS	315
11.1	INTRODUCTION	315
11.2	DEFINITIONS	315
11.3	ANALYSIS OF STONE ARTEFACTS	316
11.3.1	Artefact Taphonomy	316
11.3.2	Raw Material	321
11.3.3	Raw Material Rationing	325
11.3.4	Core Data	346
11.4	OPEN SITE LOCATION	351
11.5	CONCLUSIONS: FLAKED ASSEMBLAGES AND SITE LOCATION	375
11.6	CHRONOLOGY	378
CHAPTER 12	INFORMATION PROCESSING AND VALIDATION IN THE LATER PREHISTORY OF AUSTRALIA	380
12.1	INTRODUCTION	380
12.2	SOCIAL SCHISM IN NORTHEASTERN NEW SOUTH WALES	380
12.3	INFORMATION AND VALIDATION: PLEISTOCENE AND HOLOCENE AUSTRALIA	383

REFERENCES

ACKNOWLEDGEMENTS

As is the case with any thesis, this one would not have been produced without the assistance of many people. Firstly, I must thank all those who joined in fieldwork in often adverse conditions: Steve Sutton, who walked the gorges with me on a couple of occasions, Phil Glanville, David Randal, Scott Treadwell, Silvano Jung, Anne Lloyd, Vanessa Edmonds, Pam Dean-Jones, Andrew Border, Bruce Veitch, Harvey Johnston, John Appleton, Michelle Schouten, Iolanthe Sutton and Doug Hobbs. Good humour and hard work were greatly appreciated.

Help and advice was always readily available in the Department of Prehistory. Di Watson was always a monument of understanding and patience, and willing to share her expertise in cutting corners with the University bureaucracy and getting things done. Professor Graham Connah was supportive at all times. Doug Hobbs and Malcolm Abel always made sure the equipment was available and in good repair. Staff and colleagues provided a congenial atmosphere in which to work.

Specialist assistance was provided by a number of people. Gethin Morgan proved a treasure chest of information about the gorge country. Peter Jarman, Wal Whalley, Bob Hardin, John Robertshaw and Leslie Cameron provided numerous insights into various aspects of the environment of the tablelands and gorges, and saved me from numerous errors. John McGarity, Dept of Agronomy U.N.E., was most patient in discussing soils on the tablelands. Staff of the Dixon Library, U.N.E. and the Historic Resources Centre, Armidale C.A.E., helped track down numerous hard-to-get references. The Mitchell Library, State Library of N.S.W., and the Australian Museum Library allowed access to a number of rare books. Staff of the McIntosh Laboratory handled my dating samples with care and promptness, and Mike Barbetti discussed the results with me.

Various people made archaeological material available to me. In particular, Professor Isabel McBryde provided access to various elements of the Bendemeer collections and Professor Sandra Bowdler generously handed over the material from her Church Gully material. Both also made available notes and discussed details of their work in the study region. The Australian Museum allowed me to borrow the complete stone artefact assemblage for Bendemeer 1 and 2. Klim Gollan provided details of the results of an axe he had thin-sectioned.

Funds for the project were provided under the Australian Museum Grants-in-Aid scheme, the University of New England, and from contracts undertaken for Elcom. I am grateful to Dr Harry Lourandos for inviting me to take part in the initial stages of the project. Harry was also my

supervisor in the early stages of this project, before moving to the University of Queensland. My thanks to him for guidance during this time.

Numerous people have read various drafts of this thesis. Dr Anne Ross, Dr Mike Morwood, Bronwyn Conyers, Helen Clemens and Steve Sutton all provided detailed and useful comments, and the thesis is better for their contribution.

The National Parks and Wildlife Service, N.S.W., my employer for the last few years, has been most understanding while I have been completing this project. In particular, Bronwyn Conyers has been a model of forbearance while I have been frantically running around finishing drawings, typing up last details, photocopying, etc. All my colleagues have provided support and friendship over this time and my thanks to them for this.

It was only with the permission, assistance and advice of various land owners that I could undertake this project. Maurie Goodwin and Lindsay Youdale deserve a special mention for keys and companionship. Bev and Bob Young were always generous hosts, and I still remember pleasant days staying with them on their property, 'Glen Collin'. I only got to inspect the wrong end of shotgun once, which probably says something for the natural friendliness of the great majority of land owners I met.

I owe a great debt to my supervisors. Harry Lourandos coached me in the early days. Mike Morwood generously assisted in supervision on a number of occasions, and was always helpful in reading drafts and dealing with the necessary office minutiae. Iain Davidson was my principal supervisor over the last few years. He made telling comments which, if not appreciated at the time, on reflection always ensured a better product. He also seemed to know when to apply the cattle prod and when a bit of massaging was necessary: critical skills for any supervisor.

Phil Glanville was of unbelievable assistance in getting the thesis prepared in its final form. Apart from anything else, his hospitality allowed me to stay in Armidale on numerous occasions in the last few months to complete various details.

My parents, George and Helen, encouraged me and kept the faith, as did Lee and Anne Sparks.

Finally, Merridy, Erin, Meggsy and Megan have had to weather my many moods and absences. In spite of all, they kept on keeping on. No one could ask for more.
