HEALTH AND LIFESTYLE COMMUNITY SURVEY

The purpose of this questionnaire is to obtain information for research into health and lifestyle. The researcher conducting the survey is a Master of Arts candidate, supervised by Dr. Richard Gates, The University of New England, Armidale, N.S.W.

Your cooperation in this project would be greatly appreciated.

All information supplied by you will remain STRICTLY CONFIDENTIAL. Names are only required initially so that the researcher can post material to you personally. After the final collection of questionnaires ALL names will be discarded.

Your information will simply be combined with that of others participating in the study. Then the combined data will be statistically analysed to obtain information in general about health and possible life style stress effects, in the community. The information will be compiled into a Master's thesis.

Thank you for your assistance.

THE HASSLES SCALE (Kanner, Coyne, Schaefer and Lazarus)

Directions: Hassles are irritants that can range from minor annoyances to fairly major pressures, problems or difficulties. They can occur few or many times. Listed in the following pages are a number of ways a person can feel hassled.

First, circle or underline the hassles that have happened to you IN THE PAST MONTH. Then, look at the number on the right of the items you circled. Indicate by circling 1, 2 or 3 how SEVERE each of the circled hassles have been for you in the past month. If a hassle did not occur in the past month do NOT circle it.

Example:

3 Social obligations	1	(2)	3
