

Contemporary Sociological and Technical Development in Modern Science Fiction

Jane Davies, B.A. (Hons.), Dip. Ed.

Thesis submitted for the degree of Master of Arts (Hons.) of the
University of New England.

Approximate length 58,000 words

February 24, 1993

I certify that the substance of this dissertation is my own work and has not already been submitted in any form for another diploma or degree at any university or other institute of tertiary education.

Information derived from the published or unpublished work of others has been acknowledged in the text and a list of references is given.

Jane Davies

My warmest thanks go to my supervisor, Geoff Atkinson, who has proved such a tower of literary strength and whose efforts and patience have helped so much in the compilation of this thesis. The generosity of Jim Roselius and Adam Patrech who have lent me treasured books and magazines from their collections of science fiction is much appreciated too. I also wish to thank John McDonald, Simon Hughes, Judy Recher, and Ann Skae for their personal support without which writing would have been a much tougher task
